

## **STR | SUNringlé Tubeless Ready**

As a one of the longest standing wheel manufacturers, our extrusion experience allows us to hold consistency from rim diameter to rim diameter under tight tolerances. These are the ingredients needed for a confident tubeless seal and ride experience.

STR gives riders a convenient tubeless solution with the confidence of history and expertise of one of the hallmarks in wheel manufacturing.

- STR tubeless system creates tubeless seals that burp less, leaving you with more air inside your tire.
- Shorter sidewalls trap air better when running tubeless.
- Bead humps to retain the tire bead to the rim.
- When tubes are used the lower sidewall of a STR rim. will eliminate many of the pinch flats that occur when the tire is driven into the top of the rim.
- The combination of the lower air pressure and better tire stability allows riders to go faster with better control.

<b>Part Number</b>	<b>Description</b>
281-31724-K001	STR Tubeless tape 22mm 10M
281-31724-K002	STR Tubeless tape 25mm 10M
281-31724-K003	STR Tubeless tape 48mm 10M
281-31724-K004	STR Tubeless tape 78mm 10M
281-32168-K001	STR Tubeless tape 22mm 50M
281-32168-K002	STR Tubeless tape 25mm 50M
281-32168-K003	STR Tubeless tape 48mm 50M
281-32168-K004	STR Tubeless tape 78mm 50M
281-31724-K009	STR Tubeless Valve-35mm Brass kit (qty 2)
281-31868-K003	Rim Strip 559 60mm Wide Kit (qty 1) - Black
